Office Action Summary

Art Unit 1761

DETAILED ACTION

1. Claims 4-6 and 10-12 stand withdrawn from further consideration pursuant to 37

CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reynolds (WO 98/40406, pages 5-6).

Reynolds discloses a chewing gum including 1-50% CPP-ACP and bicarbonate. The CPP-ACP promotes dental hygiene in individuals who chew the gum. The bicarbonate acts as a buffer for the gum. Sodium bicarbonate is a conventional type of bicarbonate. Sugarless gums are also conventional. Adjusting the amount of bicarbonate to act as a buffer would be will within the skill of the routine^{SC} in this art.
